The Supportive Housing Program will assist families in securing housing. In order to secure permanent housing, the Supportive Housing Program will assist families by helping them apply for subsidized housing and to access local public and private resources for first month's rent, security deposits, utility payments, or donations of furniture.

The Supportive Housing Program will refer families to additional available resources. The Supportive Housing Case Manager and Housing Counselor evaluate the family's needs and assist them in accessing services such as budget counseling, child care subsidies, education and employment training, mental health and substance abuse training, and transportation. Through budgeting and working on goals, families are able to move towards self-sufficiency.
